

Marin county having its own television station is really the only door we have to getting completely unbiased news and information about history and health care. Everywhere in our society the mechanism of capitalism is infiltrated into the very fabric of what we are exposed to.... there always seems to be a political or financial agenda.

On Cable local television you can hear people speaking about topics from their hearts and there is no regard for numbers of listeners, advertisers being happy with how much they are paying for commercials or politicians trying to get reelected, there is a simplicity and truth to it that we must preserve.
